

RGB-M-950, Electronic Modular Gas Burner

Specifications

- Electronic modulating burner with capacity of 1000-9000 kW on gas side (100-900 Nm³/h for G20), and turn down ratio of 1:9, and NOx class II.
- Compatible with all types of combustion chambers according to EN-303 or BS-EN 12953 standards.
- Suitable for fire tube, firebox, water tube boilers, etc.
- The burner includes: mechanical components, burner head, flame tube, air fan, control
 panel, ignition devices, valves and all necessary safety devices in the gaseous fuel line.
- Burner controller: AUTOFLAME MINI MK8/MK8 or SIEMENS LMV5 depends on the policy
 of the manufacturer based on the market availability or the customer's order.
- The controller includes: main controller (PID controller), user interface, flame scanner, and actuators.
- The gas train includes: filter, regulator, main and safety valve, pressure gauges, maximum
 pressure switch, minimum pressure switch and leak test pressure switch (All according
 to BS-EN 676).

The recommended gas trains are offered in two types:

- o DN80 multi block low-pressure gas train (inlet pressure of 282-360 mbar).
- DN80 separate high-pressure gas train (inlet pressure of 2.5-4 bar).
- o If higher pressures are available, lower gas train sizes can be offered for better prices.
- Advantages: optimal design, high modulating ratio, silent operation, valve proving system, communication with external systems via Bus, and ease of
 installation and maintenance.
- Optional ability: running with FGR (Flue Gas Recirculation) in order to further reduction in NOx level, variable speed drive (VSD), running with O₂ and CO sensors (plus CO₂, NO, NO₂, and SO₂ sensors with AUTOFLAME controller), LPG fuel compatibility with LPG nozzle kits.

More information

• Fan motor: 22 kW, 3 Phase, 380-400 Volt, 50 Hz, 2900 rpm.

Operating ambient temperature: 5-60°C

Maximum combustion air temperature: 60°C

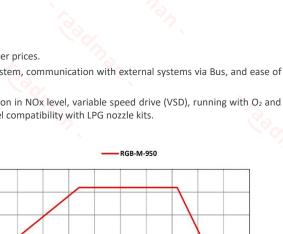

Noise emission level: 85 dB in 1.5-meter distance

Casing insulation class: IP43

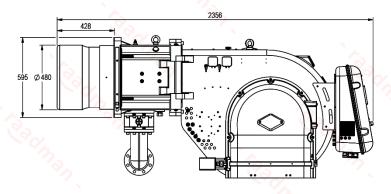

Net weight: ~561 kg

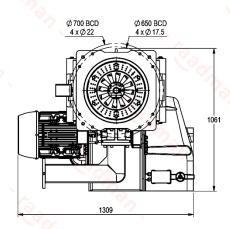

Packing dimensions (L x W x H): ~2208 x 1444 x 1200 mm

Reference conditions: Ambient temperature 20°C - Gas temperature 15°C - Barometric pressure 1013 mbar - Altitude 0 m (According to BS-EN 676).

Burner Capacity

Suggested boiler flange diameter = 495 mm

Certifications

- Certified in EAEU countries standard No.0378484.
- Certified in Iran national standard ISIRI-7595 (BS-EN 676).
